

Aayan Tech Rider

Stage Setup:

- LED and Lighting: Basic stage lighting with **AAYAN Logo on all LED screens.**
- Power: Adequate power outlets near the DJ booth, preferably with surge protection.
- Stage Monitors: Two quality stage monitors for optimal sound monitoring during performances.

Equipment:

- DJ Mixer: Pioneer DJM-series mixer (preferred model: **DJMA9** or **DJM-900NXS2**) or equivalent.
- DJ Controller: **2 Pioneer CDJ-series players CDJ3000 or CDJ-2000NXS2**
- Microphone: Wireless microphone with stand for crowd interaction.

Setup and Soundcheck:

- Setup Time: A minimum of **2 hours for setup** and soundcheck before the start of the event.
- Sound Engineer: Experienced sound engineer provided by the venue or event organiser to assist with sound setup and optimisation.

Important Additional Notes:

- AAYAN requires a clean and secure environment for all equipment and personal belongings.
- **Dedicated Media Personnel for optimal coverage**
- Any deviations from the specified equipment or setup must be communicated and approved in advance.
- AAYAN reserves the right to request additional technical requirements based on the specific venue or event.
